COLOR SELECTION MADE EASY

If you like your home’s existing color scheme, there’s really no decision to make. But if you’re looking for a change, use the following few suggestions to guide your planning:

• Rule of thumb: use 3 – 6 colors, depending on the siding and trim
• If you choose to use 2 siding colors on the same home, use the darker shade on the bottom
• One trim color and one accent color for doors and shutters
• Mix siding with shakes, scallops or stone veneer for custom appeal

CREATIVE COLOR . . . RELENTLESS PERFORMANCE

Preservation’s richer, deeper colors feature ChromaTrue® ASA polymer technology. ChromaTrue is a copolymer compound that creates a strong exterior layer of protection against fading from the sun and wear from harsh elements. Unlike traditional vinyl siding colors, which tend to be lighter tones that can withstand the damaging effects of ultraviolet rays, Preservation’s deep colors are specially formulated to retain their rich beauty season after season.

*Available in solid and vented panels for soffit use only, not as a vertical siding note. Colors are as accurate as printing techniques allow. Make final color selections using actual vinyl samples. Market profile and color availability may vary. See your Preservation Dealer for details.
