SINGLE COURSE SHAKES AND SCALLOPS

Where BEAUTY and FUNCTION MEET

WITH TEXTURES RANGING FROM ELEGANT TO RUSTIC, THESE CLASSIC PROFILES WILL GIVE YOUR HOME AN ADDED DIMENSION OF CHARACTER AND STYLE.

Beautiful, durable and virtually maintenance-free, our shakes and scallops meticulously replicate handcrafted natural cedar in a strong, high-performance polymer construction that easily withstands harsh weather.

TRADITIONAL SHAKE

The single 7" exposure and deep cedar grain texture further enhance the authentic hand-cut appearance.

SCALLOP

Distinctly uniform and elegant, the natural cedar grain texture and a single 6-1/4" exposure achieve picturesque beauty.

CAPE COD SHINGLE

The clean-line design of this double 5" profile features a natural cedar grain texture that conveys casual charm and sophistication.

HAND-SPLIT SHAKE

Rough-cut edges and a deeply grained, random texture give this 9" profile an extra measure of rustic appeal.

EXPERTLY CRAFTED TO PROTECT YOUR HOME

Exclusive features deliver the classic look of cedar without the ongoing cost and time-consuming maintenance found in other siding products.

CONTINUOUS PANEL LOCK

Integrated panel locking system secures panels tightly together for a strong, secure fit. This innovative design combines outstanding strength and durability that results in a stable and consistent appearance.

SELF-CONCEALING SEAM LOCK

The Self-Concealing Seam Lock creates virtually no visible overlaps to detract from the overall appearance. The panel's side lock features the same cedar grain detail as the panel to achieve a uniform, seamless appearance with traditional handcrafted beauty.

SELF-ALIGNING NAIL SLOTS

This right-sized aligning method precisely sizes and spaces each nail slot to provide accurate and secure installations every time. Unlike typical polypropylene panels that are center nailed, our self-aligning shakes and scallops ensure nails are properly positioned for potential expansion and contraction in all weather conditions.

EXTENDED LENGTH

Preservation's longer panel design delivers a cleaner exterior appearance by reducing panel seams, further recreating the distinctive beauty of a natural cedar installation with smooth shadow lines.

SEASON 4 TECHNOLOGY

Our shakes and scallops can be installed with confidence in almost any weather condition. A temperature chart on the nailing hem permits installers to match the current temperature to its comparable mark, allowing for ideal expansion and contraction in any season.

GALE FORCE 5 TECHNOLOGY

Our shakes and scallops are designed and manufactured to perform under challenging weather conditions; meets or exceeds ASTM D5206 industry test standard for negative windload resistance.

COLOR COLLECTION

With a wide selection of on-trend architectural colors to choose from, your Preservation Dealer of Distinction is ready to help you create the home of your dreams.
