DESIGN INSPIRATION FOR EVERY AESTHETIC

THE ART OF THE HOME

For every home and every lifestyle, Preservation offers a premier selection of siding profiles, textures and colors that merge upscale design with everyday ease. Our extensive palettes of deep saturated hues, warm shades and cool neutrals make it easy to elevate the appearance of your home with signature style.

From top to bottom, wall to wall – we have everything you need to let your perfect vision of home take shape.

CLAPBOARD SIDING

Clapboard siding features a straight, flat face and a beveled edge that recreates the appearance of wood plank siding.

DUTCH LAP SIDING

Dutch Lap siding conveys old-world craftsmanship with a coved face and bold shadow lines.

BOARD & BATTEN VERTICAL

Board & Batten adds subtle charm to any home with its 7" exposure featuring a 5-1/2" board and 1-1/2" batten strip that projects 1/2" above the panel surface.

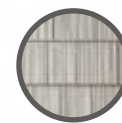

INSULATED SIDING

This high-performance vinyl panel fortified with contoured insulation will protect your home year-round from energy loss and noise infiltration.

DECORATIVE ACCENTS

Our ample selection of engineered components combines the artisan look of handcrafted trim with the easy-care properties of vinyl.

TRADITIONAL SHAKE

The authentic hand-cut appearance, 7" exposure and deep cedar grain texture beautifully recreate the appearance of genuine shake siding.

SCALLOP

Pristine and timeless, our scallops impart the artistic detail of cedar half-rounds in a single 6-1/4" profile with a natural cedar grain texture.

HAND-SPLIT SHAKE

The rustic detail of this 9" profile captures your attention with its rough-cut edges and a deeply grained, random texture.

CAPE COD SHINGLE

Quintessential seaside character and charm is effortlessly achieved with the clean-line design and natural cedar grain texture of this 5" double-course profile.

SOLID SOFFIT

Our solid soffit panels provide a resilient finish for roof overhangs, gables and other hard-to-reach areas of your home.

VENTED SOFFIT

Protecting your home inside and out, vented soffit ensures essential air circulation to help remove moisture from the roof structure.

STANDARD COLOR COLLECTION

DESIGNER COLOR COLLECTION

*Available in solid and vented panels for soffit use only, not as a vertical siding.
Note: Colors are as accurate as printing techniques allow. Make final color selections using actual vinyl samples. Market profile and color availability may vary. See your Preservation Dealer for details.

COLOR SELECTION MADE EASY

If you like your home's existing color scheme, there's really no decision to make. But if you're looking for a change, use the following few suggestions to guide your planning:

- Rule of thumb: use 3 – 6 colors, depending on the siding and trim
- If you choose to use 2 siding colors on the same home, use the darker shade on the bottom
- One trim color and one accent color for doors and shutters
- Mix siding with shakes, scallops or stone veneer for custom appeal

CREATIVE COLOR... RELENTLESS PERFORMANCE

Preservation's richer, deeper colors feature ChromaTrue® ASA polymer technology. ChromaTrue is a copolymer compound that creates a strong exterior layer of protection against fading from the sun and wear from harsh elements. Unlike traditional vinyl siding colors, which tend to be lighter tones that can withstand the damaging effects of ultraviolet rays, Preservation's deep colors are specially formulated to retain their rich beauty season after season.
