SST Warm-Edge Spacer

EnergyMaxx® High-Performance Glass Packages

ClarityOne Low-Maintenance Glass

Stainless Steel Operating Hardware

Bay and Bow Windows

Energy Savings Year-Round

Eco-Friendly

Indoor Comfort

Lifetime Limited, Transferable Warranty\*

## WINDOW BENEFITS

Beveled exterior masterframe combined with advanced vinyl that is rugged, durable and virtually maintenance-free.

A technologically advanced method of construction that delivers superior strength and produces full-contact welding points.

Adds extra strength to the sash meeting rail to help prevent flexing during heavy winds.

Same insulation as a freezer door; one of the highest-efficiency materials available.

Incorporates the elegant look of a traditional sloped sill with the energy-efficient properties of a capture sill.

Creates a super-tight seal against air infiltration, providing security and comfort.

Structural foam design blocks the path of energy loss far more efficiently than other types of spacers.

Features UV-filtering, multiple-layer Low-E glass with argon or krypton gas.

Keeps your windows clean longer than windows with ordinary glass.

For maximum strength and lifelong ease of operation.

Offer a wide selection of interior woodgrains and glass options.

Your home will be warmer in the winter and cooler in the summer with less energy spending.

Designed for superior thermal performance, vinyl windows have a long service life and achieve optimal material use and minimal waste in production.

Reduces noise transmission, creating a quieter and more peaceful home.

Including glass breakage; a written pledge of lasting quality and value.
